6                           (A) improve the habitats of fish and wild-  
7 life, including several species of fish and wildlife  
8 that are threatened or are otherwise of concern;

9                           (B) reduce wildfire management costs by  
10 reestablishing natural fire regimes outside of a  
11 wildland-urban interface;

12                           (C) improve the protection of property and  
13 homes within the wildland-urban interface; and

- 1 (D) demonstrate the manner by which—
- 2 (i) such actions can help achieve eco-
- 3 logical and watershed health objectives;
- 4 and
- 5 (ii) the use of forest restoration by-
- 6 products can offset treatment costs while
- 7 benefitting local rural economies; and
- 8 (2) this Act—
- 9 (A) encourages the economic, social, and
- 10 ecological sustainability of the region and near-
- 11 by communities; and
- 12 (B) promotes collaboration and recognizes
- 13 the positive relationship between wilderness,
- 14 forest restoration activities, and communities by
- 15 addressing multiple activities across a land-
- 16 scape, including—
- 17 (i) the implementation of forest res-
- 18 toration;
- 19 (ii) the development of biomass utili-
- 20 zation systems that include combined heat
- 21 and power generation; and
- 22 (iii) the permanent protection of
- 23 backcountry areas.
- 24 (b) PURPOSES.—The purposes of this Act are—

1           (1) to sustain the economic development and  
2 recreational use of National Forest System land and  
3 other public land in Montana;

4           (2) to reduce gridlock and promote local co-  
5 operation and collaboration in the management of  
6 forest land;

8 wood fiber—

9                 (A) to accomplish habitat restoration  
10 through the use of stewardship forestry prac-  
11 tices; and

12                 (B) to generate a more predictable flow of  
13 wood products for local communities of the  
14 State;

15           (4) to increase fish and wildlife populations and  
16 better protect and restore key watersheds and habi-  
17 tats;

18           (5) to improve the management of wildland  
19 fires;

20           (6) to reduce the size and severity of  
21 uncharacteristic fires on forest land to enhance the  
22 protection of private land, homes, and communities  
23 located adjacent to the affected forest land;

24           (7) to permanently protect and enhance motor-  
25 ized recreational opportunities in the Beaverhead-

1 Deerlodge National Forest, the Lolo National For-  
2 est, and the Kootenai National Forest; and

3 (8) to protect and enhance the wild heritage  
4 and backcountry traditions of the State through—
